- Risk, Security and Vulnerability Assessment

TECHNOLOGIES WE USE

- RFID
- NFC
- GPS
- Mobility
- Barcode
- iOS, Android, Windows

END-TO-END SOLUTIONS USING RFID, NFC AND MOBILITY TECHNOLOGY DESIGN ~ SOFTWARE DEVELOPMENT ~ DEPLOYMENT ~ TRAINING

RFID4U develops leading business intelligence solutions using RFID, NFC and Mobility technologies. Using its TAGMATIKS sensory adaptive network software platform, RFID4U delivers significant improvements in efficiency of business processes and develops new capabilities within industrial, healthcare, agriculture and social verticals that bring not only higher revenues, but also increased quality, safety and customer satisfaction. Our customers include Weir Oil & Gas, Johnson & Johnson, Fitbit, HP, Northrop Grumman, and the Department of Defense among others.

The RFID4U System based on TAGMATIKS provides real-time, cloud-based visibility of the Oil & Gas supply chain, equipment and personnel, reducing cost, and increasing efficiency and safety in your operations. You can use it for asset tracking and inventory of machinery, tools and materials; as well as monitoring safe practices, emergency response and mustering.

RFID4U has developed a **solution for valve certification**, recertification and inventory tracking using RFID tags and RFID handheld scanners and utilizing the TAGMATIKS rapid development platform.

The system features a **mobile (handheld) app** that allows to read information from RFID tags onsite and immediately update the data on the tags after the equipment is certified.

System Features & Benefits

- Mobile App, Cloud Based
- RFID Handhelds and Portals
- Hanging UHF RFID Tags
- Inventory Control of Tagged Items
- Create and Track Work Orders
- Interface with The Corporate ERP
- RFID Tag Commissioning Through an Easy to Use Application
- Updated Certification Data Written Directly to Tags
- Secure User Access and Visibility Controls
- Online and Offline Data Access
- Increased Visibility of Items and Their Status
- Improved Efficiency and Quality Control
