- Risk, Security and Vulnerability Assessment

TECHNOLOGIES WE USE

- RFID
- NFC
- GPS
- Mobility
- Barcode
- iOS, Android, Windows

RAPID DEPLOYMENT PLATFORM • CLOUD READY FULLY CUSTOMIZABLE • SCALABLE • REAL-TIME VISIBILITY

The TAGMATIKS Sensory Adaptive Network Software Platform for rapid RFID, NFC and Auto ID technology deployment, is a cutting-edge enterprise, cloud-ready software platform that enables rapid deployment and integration of scalable, real-time visibility solutions, for enterprise asset management, inventory control, warehouse management, access control, apparel tracking, work-in-process tracking, re-usable assets tracking, campus tracking, construction management, security, anti-counterfeiting and other applications.

The TAGMATIKS provides real-time, cloud-based visibility of your **supply chain, equipment and personnel**, reducing cost, and increasing efficiency and safety in your operations. You can use it for asset tracking and inventory of machinery, tools and materials; as well as monitoring safe practices, emergency response and mustering.

What can TAGMATIKS do for you **in production and post-production**? This robust but flexible intelligent platform allows for quick deployment of systems to manage your manufacturing from start to end, as well as anti-counterfeiting, warranty tracking and repairs, inventory control, shipping and warehouse management.

RFID4U develops leading business intelligence solutions using RFID, NFC and Mobility technologies. Using its TAGMATIKS sensory adaptive network software platform, RFID4U delivers significant improvements in efficiency of business processes and develops new capabilities within industrial, healthcare, agriculture and social verticals that bring not only higher revenues, but also increased quality, safety and customer satisfaction. Our customers include Johnson & Johnson, Fitbit, HP, Northrop Grumman, and the Department of Defense among others.
