

# AGRICULTURE SOLUTION

## ABOUT RFID4U

### VERTICALS

- Agriculture
- Oil & Gas
- Healthcare & Pharma
- Government
- Manufacturing
- Wearables
- Construction

### APPLICATIONS

- Asset Tracking
- Inventory Management
- Returnable Asset Tracking
- Anti-Counterfeiting
- Uniform Tracking
- Event Management
- Mustering & Emergency Management
- Personnel Tracking
- Time Tracking
- Supply Chain Management
- JIT Delivery and many more.

### OUR SERVICES

- Business Case Development
- Site Survey
- System Design
- Software Design and Development
- Implementation
- Troubleshooting
- Training
- Maintenance
- Consulting
- Benchmarking
- Project Management
- Device Tuning
- Network Cabling
- Software Installation and Configuration
- Risk, Security and Vulnerability Assessment

### TECHNOLOGIES WE USE

- RFID
- NFC
- GPS
- Mobility
- Barcode
- iOS, Android, Windows

## END-TO-END SOLUTIONS USING RFID, NFC AND MOBILITY TECHNOLOGY DESIGN ~ SOFTWARE DEVELOPMENT ~ DEPLOYMENT ~ TRAINING

RFID4U develops leading business intelligence solutions using RFID, NFC and Mobility technologies. Using its TAGMATIKS sensory adaptive network software platform, RFID4U delivers significant improvements in efficiency of business processes and develops new capabilities within industrial, healthcare, agriculture and social verticals that bring not only higher revenues, but also increased quality, safety and customer satisfaction. Our customers include Crookham Company, Johnson & Johnson, Fitbit, HP, Northrop Grumman, and the Department of Defense among others.

With the RFID4U's system you have all the information about your agricultural operations at your fingertips. Flexible and powerful, the TAGMATIKS platform enables product tracking from seeding to harvest, equipment tracking for asset utilization and repairs, transportation and inventory management, full visibility into the field operations and quality control.

RFID4U developed a centralized field operations system that allows task creation, task assignment and automatic count of hours on the go via a mobile app (iOS, Android or Win), as well as backend system that provides a complete view of all tasks, their status, fields and crew, and generate and distribute reports.

### System Features & Benefits

- Mobile App & Backend Application
- iOS, Android, Windows, Cloud
- Reports, Dashboards, Analytics
- Easy to Create Tasks and Reports
- Tiered Access
- Automatic Text, Email to Crew
- Daily and Accumulated Hours
- Paperless Operation
- Increased Operational Efficiency
- Real-Time Operational Visibility
- Increased Quality Control
