- Project Management
- Device Tuning
- Network Cabling
- Software Installation and Configuration
- Risk, Security and Vulnerability Assessment

TECHNOLOGIES WE USE

- RFID
- NFC
- GPS
- Mobility
- Barcode
- iOS, Android, Windows

END-TO-END SOLUTIONS USING RFID, NFC AND MOBILITY TECHNOLOGY DESIGN ~ SOFTWARE DEVELOPMENT ~ DEPLOYMENT ~ TRAINING

RFID4U develops leading business intelligence solutions using RFID, NFC and Mobility technologies. Using its TAGMATIKS sensory adaptive network software platform, RFID4U delivers significant improvements in efficiency of business processes and develops new capabilities within industrial, healthcare, agriculture and social verticals that bring not only higher revenues, but also increased quality, safety and customer satisfaction. Our customers include Johnson & Johnson, Fitbit, HP, Northrop Grumman, and the Department of Defense among others.

The mismanagement of returnable containers, such as crates, pallets, carts and other shipping containers has massive effects on the time, labor and costs associated with their shipping, receiving and location. The RFID4U Asset Management System provides a complete asset lifecycle tracking and management. ROI is created by increased efficiency of asset usage, including its location, allocation and return.

For a full real-time visibility of fixed and returnable assets the RFID4U Asset Tracking System uses a cloud based application based on TAGMATIKS in conjunction with the UHF RFID Tags, RFID enabled portals and RFID handheld scanners.

- The application allows for automatic data collection from Asset RFID tags
- Upload of Asset Data to ERP
- Download of shipping data and work orders from ERP
- Barcode/RFID Printer Application allows for printing and commissioning Asset RFID Tags.

System Features & Benefits

Mobile App & Desktop Interface,
Cloud Based

Interface with the ERP

Inventory control

Location & Logistic History

Secure user access and visibility controls

Dashboards and Reports

Generation & Distribution

Alerts on Return Delays or Change of Location

Time and money savings on quick asset location
