- Consulting
- Benchmarking
- Project Management
- Device Tuning
- Network Cabling
- Software Installation and Configuration
- Risk, Security and Vulnerability Assessment

TECHNOLOGIES WE USE

- RFID
- NFC
- GPS
- Mobility
- Barcode
- iOS, Android, Windows

END-TO-END SOLUTIONS USING RFID, NFC AND MOBILITY TECHNOLOGY DESIGN ~ SOFTWARE DEVELOPMENT ~ DEPLOYMENT ~ TRAINING

RFID4U develops leading business intelligence solutions using RFID, NFC and Mobility technologies. Using its TAGMATIKS sensory adaptive network software platform, RFID4U delivers significant improvements in efficiency of business processes and develops new capabilities within industrial, healthcare, agriculture and social verticals that bring not only higher revenues, but also increased quality, safety and customer satisfaction. Our customers include Johnson & Johnson, Fitbit, HP, Northrop Grumman, and the Department of Defense among others.

The RFID4U Uniform Tracking System provides full Inventory and supply chain management of the uniforms from purchasing through receiving, stocking, picking, shipping all the way to uniform issuance to personnel utilizing a combination of technologies such as RFID and barcode including Handheld, Portal and Smart Table Readers.

The system can be used for tracking uniforms and laundry in various verticals:

- Military and Government
- Hospitality (hotels and restaurants)
- Manufacturing
- Services and many others.

The Uniform Tracking Solution is based on TAGMATIKS, our cutting-edge enterprise, cloud-ready sensory adaptive network software platform, that enables rapid deployment and integration of scalable, real-time visibility solutions.

HARDWARE

Specialty Laundry RFID Tags that survive washing, high temperatures and chemical cleaning, RFID labels for tracking new items and case and pallet tracking.

System Features & Benefits

- Mobile App & Desktop Interface, Cloud Based
- Automatically processes laundry in batches, carts and racks for automated shipping and receiving.
- Fast on the spot inventory count.
- Ultimate visibility of uniform location and status, length of time at each location.
- FIFO processing.
- Automated issue and tracking uniform items based upon a pre-determined Item Issue List including validation and reporting.

System uses handhelds, fixed readers, RFID Smart Tables and RFID readers attached to laundry chutes and dispensing cabinets.
